

## Challenge: Increase data productivity, security & compliance while reducing costs.

## Solution: Oxygen's Winshuttle SAP data loading & extraction solutions.

Founded in 2003, Winshuttle, Inc. is the leading provider of data loading and extraction tools for SAP users worldwide. Winshuttle's products replace manual data entry and complex technical tools by easily and securely shuttling data between Microsoft Excel or Access and SAP without programming.

Oxygen is Australia and New Zealand's only licensed reseller and implementer of Winshuttle software solutions.

The Winshuttle solution consists of two main products: transactionSHUTTLE allows the simplified creation of upload scripts and then execution. querySHUTTLE enables simplified creation of ad hoc queries and subsequent execution. Both of these products have run time only versions which can be given to users who you don't want to create data objects.

A third product which governs the data upload process. eSHUTTLE provides centralised control of upload and download of data. This product integrates with Microsoft Office and Sharepoint to ensure all data is approved before upload and full traceability is maintained for uploaded data. This is ideal for environments with high compliance requirements.

Oxygen's trained SHUTTLEmasters assist organisations to match their data requirements with the most appropriate solution in the portfolio. We then assist with solution implementation, SAP mapping and query design and support.

### Typical challenges

- › Lots of manual or repetitive data entry into SAP
- › Users requesting upload programs or tools to simplify the data entry process
- › Help desk or IT department is regularly uploading mass data files for end users
- › Large numbers of LSMW or CATT files being used in the business (alternative to using transactionSHUTTLE)
- › Lack of control over data uploads for roll outs
- › Large investment in Business Intelligence tools with constant requests for new data or cubes that are used only a limited number of times.

### Realisable benefits

#### IT cost reduction:

- › Reduced time for users or IT staff creating upload programs
- › Reduction in the number of interfaces and upload programs required to be upgraded
- › Reduction in the number of ad hoc data queries through the BI system

#### End user increased efficiency:

- › Reduced manual data entry by the simple execution of uploads
- › Increased system utilisation and accuracy through better maintained data

- › Increased access to ad hoc data requirements from the system

#### Increased compliance and visibility:

- › Systematic capture of all data uploads
- › Auditable data upload approval and validation
- › Enhanced control over data load and extract functionality compared to SAP alternatives

### People, technology, process – the SmartStart approach

With Oxygen's SmartStart Winshuttle partner solutions you benefit from the combination of Oxygen's experience and Winshuttle's award winning SAP data load and extraction tools.

Oxygen consultants work with you to implement the software and integrate processes into the day to day operating procedures of your organisation.

Our complete solution includes training and change material to ensure your entire organisation is brought on a journey with people not technology leading the way.

#### About SmartStart by Oxygen

SmartStart by Oxygen solutions are pre-packaged offerings that allow organisations to get a product or service up and running for less cost, in less time, at a lower risk.

Many organisations are under pressure to innovate swiftly. Oxygen recognises this need and has developed a way of delivering standard SAP, or where it makes sense – complementary partner solutions across a number of key business functions or project processes, to help clients realise quick wins.

The SmartStart by Oxygen approach reduces cost, decreases implementation time and delivers a defined set of benefits – your guarantee that what you see is what you get. It also brings together the best non-SAP solutions to help enable you to get more value from your core SAP investment.
