

Challenge: Provide an integrated EHS management system that works with your business.

Solution: Oxygen's Environment, Health & Safety SmartStart Solution.

As a foundation for corporate sustainability initiatives, the Oxygen Environment, Health and Safety (EHS) SmartStart helps you overcome the challenges of disconnected systems, regions, and departments. Using SAP EHS, you can centralise the collection of EHS information and report successfully on the positive impact of your global EHS strategies.

Demonstrating leadership in the areas of EHS responsibility and sustainability can also enhance your corporate image and brand value.

Adding to the functionality inherent in SAP EHS, Oxygen's SmartStart includes the following functions developed by Oxygen:

- › Preconfigured Document Management
- › Incident & Hazard Management Workflows
- › Preconfigured Analytic Reports
- › Preconfigured printable Incident and Hazard Report forms
- › Standard Coding based on Safe Work Australia & Australian Standard Coding standards supplemented by Oxygen SmartStart Coding
- › Adobe SAP interactive forms for simplified input and printable reports

Typical challenges

Does your organisation suffer from these typical EHS management problems?

- › Current EHS systems not meeting legislative requirements
- › EHS data 'hidden' throughout the organisation
- › Lack of hard information on incidents, hazards or corrective actions

- › Poor follow up on corrective actions
- › Inconsistent EHS processes and data across the organisation
- › Resource intensive reporting
- › Delays in reporting
- › Difficulties getting real time data

Realisable benefits

Quality System

- › SAP EHS is an advanced, up to date management system. It is utilised internationally by private and public organisations across all industries
- › SAP EHS continues to evolve and will remain in sync with the evolution of SAP

Accurate Information

- › Simplified auditing with a single verifiable source of EHS data
- › Authorised personnel have immediate access to EHS data and documents
- › Integration into other SAP modules including FI, HR, PM, MM & DMS

Automated Notifications

- › Predefined notifications for incidents, hazards, safety measures and risk assessments.
- › Escalations for overdue tasks

Standard Process

- › Single process organisation wide
- › Mature and complete process for incident and hazard recording, investigation and risk assessments

Reporting

- › Simple real time reporting on EHS statistics.
- › Immediate reporting on the status of incidents, hazards, risk assessments and corrective actions

All of the Oxygen Environment Health & Safety SmartStart functions remain within SAP.

People, technology, process – the SmartStart approach

With the Oxygen Environment Health & Safety SmartStart solution you benefit from the combination of SAP software and Oxygen's years of implementation experience. Solution training and change material are also included to ensure your entire organisation is brought on a journey with people not technology leading the way.

Oxygen's solution can be implemented as an out of the box installation covering all aspects of implementation from set-up to post go live support. Alternatively for existing SAP EHS customers, functionality can be cherry picked and added to your existing system.

About SmartStart by Oxygen

SmartStart by Oxygen solutions are pre-packaged offerings that allow organisations to get a product or service up and running for less cost, in less time, at a lower risk.

Many organisations are under pressure to innovate swiftly. Oxygen recognises this need and has developed a way of delivering standard SAP, or where it makes sense – complementary partner solutions across a number of key business functions or project processes, to help clients realise quick wins. The SmartStart by Oxygen approach reduces cost, decreases implementation time and delivers a defined set of benefits – your guarantee that what you see is what you get. It also brings together the best non-SAP solutions to help enable you to get more value from your core SAP investment.
