

Challenge: Establish auditable business processes that simplify data collection, monitoring & reporting.

Solution: Oxygen's Environmental Compliance SmartStart.

Organisations are being challenged to track and comply with increasingly complex environmental regulations and requirements, while providing increased accountability and transparency of environmental performance to their shareholders and the public.

Effective management of these compliance requirements and associated business risks is difficult and costly with non-standard, manual processes and disjointed information systems.

SAP Environmental Compliance enables companies to implement clear, transparent and auditable processes that streamline and automate environmental compliance tasks and reporting.

The Oxygen Environmental Compliance (EC) SmartStart solution utilises SAP Environmental Compliance to aid operational efficiency with the provision of:

- › An intuitive Web interface simplifying user access to controls and reports aiding collaboration across an organisation
- › Integration with ERP software and control systems automating processes and improving the quality of results
- › A single management platform simplifying environmental compliance business processes required in the air, water and waste domains
- › A complete set of tools and functions for collecting, validating, monitoring and reporting data and process results
- › A sophisticated task and workflow management engine to help manage processes, data submissions and scheduled activities
- › Personalised task lists to execute and complete assigned work issues

Typical challenges

- › Lack of consistent information tracking for all processes within the organisation
- › Data cannot be trusted for enterprise planning and risk management
- › No transparency for shareholders, investors and the public
- › Difficulty fulfilling required regulations (state, federal and international)
- › Inability to identify deviations and critical issues in a timely basis
- › Difficulty maintaining plant productivity
- › Lack of real time reporting

Realisable benefits

With the Oxygen EC SmartStart business leaders and professionals at corporate, business and plant levels can:

- › Cost-effectively track and manage air, water and waste emissions and discharges
- › Automate resource-intensive compliance and reporting requirements
- › Standardise processes for permitting and compliance tasks
- › Proactively identify and manage risks and deviations
- › Reduce financial and operational risk through proactive tracking and detection of key data
- › Enhance the reliability of environmental business processes with data and process integration

Emissions management

- › Control, track, measure, and document emissions
- › Align business processes to comply with environmental regulations
- › Maintain compliance by comparing calculated emissions to internal or external-set limits
- › Receive warning or deviation e-mail notifications if limits are compromised

Reporting

- › Flexible reporting functionality allows personalised views of important business data
- › Able to automatically populate report templates with facility data
- › Designed for integration with Business Intelligence and Business Objects (BI, BO)

People, technology, process – the SmartStart approach

With the Oxygen EC SmartStart you benefit from the combination of SAP software, and Oxygen's years of implementation experience.

Our complete solution includes training and change material to ensure your entire organisation is brought on a journey with people not technology leading the way.

About SmartStart by Oxygen

SmartStart by Oxygen solutions are pre-packaged offerings that allow organisations to get a product or service up and running for less cost, in less time, at a lower risk.

Many organisations are under pressure to innovate swiftly. Oxygen recognises this need and has developed a way of delivering standard SAP, or where it makes sense – complementary partner solutions across a number of key business functions or project processes, to help clients realise quick wins. The SmartStart by Oxygen approach reduces cost, decreases implementation time and delivers a defined set of benefits – your guarantee that what you see is what you get. It also brings together the best non-SAP solutions to help enable you to get more value from your core SAP investment.
