

Challenge: Provide a best of breed maintenance solution that grows with your business.

Solution: Oxygen's SmartStart Plant Maintenance solution.

Oxygen Plant Maintenance provides a best of breed Computerised Maintenance Management System utilising SAP PLM with selected add on software from Synactive and Prometheus. The solution has been perfected over many years with the input of professional maintenance practitioners ensuring a user friendly and functionally rich solution that covers all the needs of a modern maintenance organisation.

In addition to all the standard functions in SAP PM, Oxygen's solution includes the use of the following partner software:

- › Synactive GUIXT for simplified screens
- › Prometheus for advanced scheduling and document printing

Adding to the rich functionality inherent in SAP PM Oxygen's Plant Maintenance solution includes the following functions developed by Oxygen.

- › Document management
- › Follow up work orders
- › Overall completion screen
- › Preconfigured meeting specific reports
- › Standard root cause failure codes

Typical challenges

Does your maintenance organisation suffer from these typical asset management problems?

- › Lack of hard information on reliability
- › Poor maintenance cost performance
- › Poor equipment reliability
- › Wasted resources
- › Staff spending time on computers not on the tools

Realisable benefits

Oxygen Plant Maintenance overcomes these problems offering the following benefits:

Reduced cost

- › Increased labour utilisation with advanced scheduling and planning tools
- › Do the right jobs with prioritisation
- › Execute efficiently with work instructions and parts planning

Increased reliability

- › Bad actor analysis
- › Preventative and condition based jobs
- › Improved adherence to schedule and process

Grows with your business

- › Maturity roadmap for maintenance organisation

- › Integrates maintenance best practice with system
- › Expandable and modifiable to suit your needs

All within SAP

- › All functions remain within in SAP
- › Additional software is supplied by certified SAP solution providers

People, technology, process – the SmartStart approach

With Oxygen's SmartStart Plant Maintenance solution you benefit from the combination of SAP software, strategically selected software partners and Oxygen's years of implementation experience.

Oxygen's solution can be implemented as an out of the box installation covering all aspects of implementation through to post go live support. Alternately for customers already with SAP PM functionality can be cherry picked and added to your existing system.

Our complete solution includes training and change material to ensure your entire organisation is brought on a journey with people not technology leading the way.

About SmartStart by Oxygen

SmartStart by Oxygen solutions are pre-packaged offerings that allow organisations to get a product or service up and running for less cost, in less time, at a lower risk.

Many organisations are under pressure to innovate swiftly. Oxygen recognises this need and has developed a way of delivering standard SAP, or where it makes sense – complementary partner solutions across a number of key business functions or project processes, to help clients realise quick wins. The SmartStart by Oxygen approach reduces cost, decreases implementation time and delivers a defined set of benefits – your guarantee that what you see is what you get. It also brings together the best non-SAP solutions to help enable you to get more value from your core SAP investment.
