

HOW DO I ACHIEVE A TRANSPARENT GRANTS MANAGEMENT PROGRAM FOR MY ORGANISATION?

Implement Oxygen's Grants Management solution based on the ANAO 'Better Practice Guide'

Critical Business Issue

Does your organisation suffer from these typical grants management problems?

- Poorly targeted delivery of grants
- Lack of transparency in the grants process
- Excessive red tape hinders smooth grants execution

SAP® and Oxygen for Grants Management

Oxygen Grants Management provides a grants management solution that supports the NSW Department of Premier and Cabinet 'Good Practice Guide' and the Australian National Audit Office (ANAO) 'Better Practice Guide'.

Oxygen's Grants Management solution brings together SAP®'s Customer Relationship Management software to enable agencies to manage grants to the greatest benefit of the community.

Oxygen's Grants Management solution provides simplified online forms that populate into SAP without rekeying.

A UXXE COMPANY

THE BEST-RUN BUSINESSES RUN SAP™

Three Steps to Improved EHS data management

Step 1: Expert Roundtable

Oxygen visits on-site and discusses the processes necessary to establish an SAP CRM-based grants management solution. We use this opportunity to learn how the grants management system can be adapted to suit an organisation's unique grants program.

Step 2: Maintenance Benchmark Workshop

Working in a collaborative forum with the customer, Oxygen stages a one-day workshop, to identify the current maturity level of grants management processes and understand where value can be added through the change to 'best practice' processes. We work with the customer to create a roadmap to move the organisation forward, at a pace that makes sense for its requirements, and in a sequence that will work.

- Document your "as is" and "to be" states
- Generate a long term roadmap for an organisation's grants management needs
- Identify business benefits that will support the business case to install the Oxygen Grants Management solution

Step 3: Fast Track Deployment

Oxygen's SAP Grants Management solution can be deployed quickly and allows each organisation to benefit from SAP commercial, off-the-shelf software. The solution is configured to meet each organisation's local requirements by Oxygen consultants with years of State and Federal Government experience.

Take advantage of Oxygen's Rapid Implementation Models

1. Dedicated partnership with SAP on grants management value scenarios
2. Achieve positive impact to the bottom line via Oxygen's deep process and real world business experience
3. Complete end-to-end solution implementation with seamless integration
4. Strong program management, consulting and change management
5. Improve in-house expertise via knowledge sharing and training
6. Fixed scope, cost and timeline
7. Realise value quickly – within six months
